

Foam Profiling

Our foam inserts feature highly detailed CNC profiling to fit the parts securely. Provides excellent surface and edge protection.

Acres Engineering utilize top quality profile cutting to manufacture custom foam products to suit the client's specifications perfectly. We can design and produce high quality foam materials to meet the needs of your project.

We quality test all materials we use in foam profiling, so that you are guaranteed to receive the best products available.

We work with you to come up with the best solution for your project choosing the best material and the best design to ensure your products are always kept secure and protected.

- Shadow Foams designed to suit product.
- Any combination of two colours.
- Optimize layout.
- We can supply wide range of colours, materials and dimension.
- Durable material offering strong protection.
